Education

Da Nang University of Science and Technology

Master's student, Computer Science

Oct 2025 - Present (Apr 2026)

Da Nang University of Science and Technology

Bachelor's degree, DS-AI

Oct 2020 - Aug 2024

GPA: 3.47 - Very good

Publications

Than Van Hong Son*, Tran Dinh Minh Khoa, Luong Thien, Le Duc Tho, and Le Viet Hung. “[A Deep Learning Approach for Real-Time Detection and Evaluation of Oranges on Mobile Devices](#)”, published in Proceedings of the 1st International Conference on [SETSM 2024 \(Springer\)](#).

Hung Le Viet*, Han Le Hoang Ngoc, Khoa Tran Dinh Minh, Son Than Van Hong. “[A Deep Learning Framework for Gym-gesture Recognition Using The Combination of Transformer and 3D Pose Estimation](#)”, published in [Cybernetics and Physics Journal 2024](#).

Work Experience

BK HIGH TECH

July 2025 - Present (10 mos)

AI Engineer

Comic AI Translation

Remote - Da Nang, Vietnam

An automated AI translation pipeline for comics, slashing manual processing time and optimizing the workflow for localization teams.

Responsibilities:

- Managed a cross-functional AI team; responsible for task allocation, resource management.
- Designed and implemented end-to-end AI solutions for automated comic book translation (**OCR, translation, and inpainting**)
- Developed a multi-agent orchestration system using **LangChain** to enhance translation quality and consistency for **local LLMs**.
- Leveraged time series analysis to monitor model performance metrics and forecast system resource requirements.
- Successfully optimized AI models to run entirely on **local environments with constrained GPU resources** through techniques like quantization and efficient VRAM management.
- Collaborated with stakeholders** to gather requirements and integrate feedback into the product **development lifecycle**.

PERMATE

Apr 2024 - Jan 2026 (1 y 9 mos)

AI/Product R&D Specialist

Product - Permate (<https://permate.com>)

Da Nang, Vietnam

Permate is a performance partnership platform, operating in the field of Affiliate Marketing. It integrates a lot of optimized technologies.

Responsibilities:

- Designed an MLOps platform (Airflow - Jupyter - Feast - MLFlow - Grafana - Docker)
- Researched and deployed a specialized Lead Management System for a **FinTech R&D project** targeting the **US** market.
- Collected and processed customer data from the browser.
- Implemented a solution to prevent customer fraud, **time-series data**.
- Implemented a solution to analyze customer journeys.
- Identified multiple visits from the same device.
- DevRel:
 - Provided technical assistance to clients, ensure seamless product integration and high satisfaction.
 - Acted as the primary bridge between Sales, Marketing, and DEV teams.
 - Authored and maintained comprehensive project documentation.

BK HIGH TECH

Oct 2022 - Mar 2024 (1 y 6 mos)

AI Engineer - Generative AI

Pixor AI (<https://pixor.ai>)

Sep 2023 - Mar 2024 (7 mos)

Da Nang, Vietnam

Pixor AI is a complete AI product application for users, applying Stable Diffusion for image generation from prompts.

Responsibilities:

- Stable Diffusion Model: researched paper
- Built a Hashtag classification model with the MobileNetV2 model.
- Trained face recognition and swapping model with ResNet50 (face recognition) and SimSwap (face swapping).

AI Engineer Intern - Computer Vision
Smartinside AI

Mar 2023 - Aug 2023 (6 mos)
Remote - Korea

Smartinside AI is a project applying AI to monitor real construction sites.

Responsibilities:

- Mainly enhanced the tracking and reID efficiency for the MOT problem with multi-camera inputs.
- Applied DeepStream for real-time MOT problems.
- Estimated the length of cracks in the construction site.
- Calibrated the camera to apply directly at the construction site.
- Predicted the movement trajectory of workers.
- Created a point-cloud map of the construction site based on the Depthmap problem.
- Identified people who have fallen.

.NET Developer Intern

BKCIT (<https://bkcit.dut.udn.vn>)

Oct 2022 - Mar 2023 (6 mos)

Da Nang, Vietnam

BKCIT is an IT center management system for DUT-UD.

Responsibilities:

- Performed automatic arranging of candidates into appropriate exam sessions and exam rooms.
- Implemented the user interface.
- Developed CRUD functions for employees, posts, courses, ...

Technical Skills

Programming Languages & Dev Tools
Libraries & Frameworks

Python, C, C++, C#, R, Javascript, Matlab
TensorFlow, PyTorch, Keras, SQL, NoSQL, Docker,...

Certifications & Activities

TOEIC 720/990
ETS

Issued Dec 2023 - Expires Dec 2025

AI VIETNAM
Foundation of AI

2021

Honors & Awards

Top 2 TAS Design Competition
NLP

Dec 2023
Da Nang, Vietnam and Japan

Top 3 AI4LIFE
Computer Vision

Apr 2023
Da Nang, Viet Nam
